

Launch Into Your Future

Two-Year College Advising and Student Success Supports

Three ideas to use now

- **Know this**

- Two-year colleges support career entry, transfer, skill development, certificates, diplomas, and associate degrees.
- Advising should connect the student's goal to a program map before course selection.
- Tutoring, accessibility, career, first-generation, financial, and technology supports vary by campus and program.

What to know. What to verify.

Start here

- Two-year colleges support career entry, transfer, skill development, certificates, diplomas, and associate degrees.
- Advising should connect the student's goal to a program map before course selection.

Verify before acting

- Do not assume every course applies to a credential or transfers to the destination program.
- Do not promise support eligibility, course availability, transfer, aid, or completion timing.

Build your action plan

- **Next moves**

- Clarify whether the goal is career entry, transfer, skill development, or exploration.
- Choose the program or credential that best supports the goal.
- Complete admission, residency, readiness, and financial-aid steps.
- Meet with an academic counselor for initial advising and first-term planning.
